Good afternoon,

Thank-you for the kind thoughts. We have received nothing new regarding the project and it's proposed sewage treatment plant. We won't schedule a hearing on the matter until they present a detailed proposal regarding the variance that they are seeking.

Hi Richard,

I hope you're doing well.

Any word on the variance request before the DBR?

Thank you,

-chris

There are no other hearings anticipated regarding this project; just the expected variance request before the Department's Board of Review. Regarding the referenced variance request, at this time a date has not been set for the hearing concerning the referenced project. The department's Division of Environmental Quality will keep your e-mail address on file and notify you when and where the hearing is scheduled.

I have received other e-mail requests worded as yours was; I have or will respond to all of them. However, several of the e-mail addresses have "bounced" back probably because the address is screened out by our IT controls. Where that has happened, I have advised our staff to be sure and notify these individuals via traditional United States mail when a date is set. I would appreciate it if you could advise your membership of this so that they will know we have received their request and will

notify them. Thank-you.
